

RIVAYAT Algolia Indexing Record

Prepared for rivayat.shop search setup. Generated on 2026-08-24 with 32 active product records from the supplied catalogue.

Website	https://www.rivayat.shop
Recommended Algolia index	rivayat_products
Record file in repo	/algolia-records.json
Public product URL pattern	https://www.rivayat.shop/product/{slug}
Sitemap for Google Search Console	https://www.rivayat.shop/sitemap.xml
Product count	32
Categories	Cricket Jerseys, Football Jerseys, Jackets, Overshirts, Shorts, T-Shirts, Women
Price range	Rs. 449 to Rs. 1299

Record Schema

Upload /algolia-records.json to Algolia as JSON records, or use the existing server-side sync with ALGOLIA_ADMIN_API_KEY. Each object contains public catalogue data only.

Field	Purpose
objectID	Stable Algolia object ID using the Rivayat product id.
name, description, searchableText	Primary searchable text.
category, color, badge, sizes, _tags	Filtering and merchandising facets.
price, mrp, discountPercent	Sorting, filtering, and price display.
rating, reviews, popularity	Ranking inputs. Ratings stay 0 until real approved reviews exist.
imageUrl, imageWidth, imageHeight	Search result thumbnails without recompressing images.
url	Canonical product result URL for click-through.
inventory, inStock, totalStock	Stock-aware filtering.

Recommended Algolia Settings

Searchable attributes: name, unordered(category), unordered(color), unordered(badge), unordered(description), unordered(searchableText).

Attributes for faceting: category, color, sizes, badge, inStock, _tags.

Custom ranking: desc(popularity), desc(inStock), desc(rating), desc(reviews), asc(price).

Displayed attributes: objectID, name, category, price, mrp, discountPercent, imageUrl, url, badge, color, rating, reviews, inStock.

Typo tolerance can stay enabled. Set distinct=true only if future variants create duplicate product names.

Render Environment Variables

Required for Algolia search to run from the deployed app:

```
ALGOLIA_APP_ID  
ALGOLIA_SEARCH_API_KEY  
ALGOLIA_ADMIN_API_KEY  
ALGOLIA_INDEX_NAME=rivayat_products
```

Use the Search-Only key for customer search and keep the Admin key server-only in Render. The code falls back to MongoDB search when Algolia credentials are not configured.

Google Search Console Submission

Submit this exact sitemap URL: <https://www.rivayat.shop/sitemap.xml>

The sitemap contains public pages and 32 product pages with image tags. robots.txt allows public pages and product pages, while blocking login, signup, account, cart, checkout, admin, API and operational paths.

Full records are committed in /algolia-records.json. Keep this file updated whenever catalogue products, prices, stock, names or images change.

Manual Algolia Setup Checklist

- Create an Algolia application and index named rivayat_products.
- Import /algolia-records.json as JSON records, or run the existing admin reindex endpoint after adding Render variables.
- Apply the searchable attributes, facets and custom ranking listed in this document.
- Add ALGOLIA_APP_ID, ALGOLIA_SEARCH_API_KEY, ALGOLIA_ADMIN_API_KEY and ALGOLIA_INDEX_NAME on Render.
- Test the Rivayat search box for name, category, jersey, cricket, football, colour and price-related queries.
